Scratch that – I see from Joanna’s email this morning that CNR is working on this. I will not send anything to Mahmud.

Could we reach out to CNR and get an estimated time of completion. As this is the last bit of info we need, the entire award is affected. I will be glad to assist if desired/necessary. A little pressure may be appropriate at this juncture.

Many Thanks,
Royden

Hi All,

As the last item we need is Dr. Farooque’s agreement prior to sending in the budget, I will reach out to him by email and let him know the importance of this document. I will also copy you all.

Will send something in 15 minutes unless I hear from you.

Thanks
rs

All, I have made the suggested updates. The only item still pending is Dr. Farooque's consulting agreement with ASU - apparently he has to consult as an independent person and not part of ASU. The CNR research office is still working out those details, but everything else is finished.

I plan to send the final email around 1:30 p.m and will copy you all.

Thanks for your help in bringing all this information together!

Cheers,
Joanna

Hi Joanna,

I shared it with Jason (copied here) as his input on the \$14040 cost for NCSU item #4 would be very helpful there. We used the numbers Jason and his colleagues provided, but not recalling the calculation that went into those if we had it. I put in \$1170 for 12 participants as this was the number for Raleigh to Los Angeles for a different workshop.

All, here are my answers to the various questions in blue; red items are pending or need clarification.

Please take a look and make any changes as needed.

I plan to send this out today. CNR is reviewing a Keystone consulting agreement so that might be included, but apparently the ASU consultant might not be affiliated with ASU for consulting. In that case, I will notify DARPA that his consulting agreement is still in progress while we sort it out.

Thanks!
Joanna
