Thanks.

I do know Doug and could help with contacting him.

Hi Fred

Thank you for the suggestion below. Hapsa is now on holidays so I am following up on her behalf. I think it's a good angle and UCS is likely to be quite vocal at some point on this so it might be an interesting link. I will add him to the list of suggestions and the committee can discuss in which order they would like us to approach people. Can I assume you know him and might be able to help with contacting him?

Best

Isabelle

Hi Hapsa,

Sorry for the delay. The qualification listings that you have don't fit anyone that I know.

I was thinking that we wanted somebody who could connect us to NGOs who would be critical of GE crops but may be open to

GE mosquitoes and who would care about scientific evidence.

Doug Gurian-Sherman who used to work with the Union of Concerned Scientists but is now an

independent consultant seems like
a good person for that niche.

Dear all,

I hope this email finds you well. As it was discussed during last meeting, the Committee members were to provide suggestions of new members so that a short list could be circulated to the group to consider and prioritize.

The group would be looking for someone from the following profile:

- NGO community/development with malaria background
- Community engagement people/
- Experts in ecology and conservation or interested in bio-control
- Experts from Africa with experience in public health
- African NGOs

Could you please send your suggestions by return of email. I will be happy to compile them and circulate for a final decisions.

Please do not hesitate if you have any question regarding this I will be happy to help!

Cheers,
Hapsa

Subject: Notes Ethics Committee June 2017 meeting

Dear all,

Thank you so much for your participation to the Ethics Committee meeting this month. Please find attached the notes from the meeting with the actions points as well as the following documents that were discussed during the meeting:

- Results from the Workshop “Problem formulation for the use of gene drive in mosquitoes” (Stephanie James)
- Evaluating strategies for reversing CRISPR-Cas9 gene drives (Fred Gould)

We are setting up a Dropbox file where all these documents will be shared as well as the notes from previous meetings and other materials (speakers presentations...). We kindly remind you that the Dropbox file will be subjected to the CDA agreement. We are happy to include any material you might judge relevant to share with the Committee.

Also, we would like to thank you for your participation to the Doodle Poll to set up next meetings, I will follow up the calendar invites for the next Ethics Committee meetings in 10th & 11th January 2017 and in June 2017 (18th - 22nd). For the June 2018 meeting it was discussed that the meeting might take place in London like this year (2 days meeting) or Mali / Uganda (5 days), I will send a 5 days invite in the meantime and will inform you as soon as this is decided.

On another note, we would like to proceed with payments of the Honorarium (1000 GBP). For context, last year, some of you decided to receive or donate it. Should you choose to receive it, we would need you to fill the attached Supplier Form and send it at your earliest convenience so we can proceed with the wire transfers. For those of you who have already sent their Supplier Form last year, thank you very much.

Following this email, I will contact you individually regarding your expenses during your stay in London for the meeting. I will copy Tracey from our team, who will be handling the all the payments.

Should you require any additional information in the meantime, please don't hesitate to reach out, we will be happy to assist you!

Cheers,
Hapsa
